

2). Allocations – Non-irrigation in the proposed District Wide LEMA:

“a) Livestock and poultry use will be encouraged to maintain their use at 90% of the said amount provided by K.A.R. 5-3-22 based on the maximum amount supportable by the number of animals authorized by a current facility permit. At no time will a stockwater right be authorized to pump more than its authorized quantity.

d) When converting from irrigation to non-irrigation use, the base water right will be converted under the procedures in K.A.R. 5-5-9, 5-5-10, or Groundwater Management District #4 regulations, and the appropriate non-irrigation Local Enhanced Management Area allocation will apply as found in Section 2 for the remainder of the Local Enhanced Management Area period. “

Parts b), c), and e) will remain as proposed. As the changes in the stockwater language are different than the proposed District Wide LEMA, these changes will have to be presented at the second hearing.
