

**Thomas HPA TH-4
February 5/6, 2009 Meeting
Participant Comments (C) / Questions (Q) and District Responses (R)**

Q: What are the water right priorities in this area?

R: Staff will produce a list and provide them to the requestor.

C: While stakeholder interest from this HPA seems low, don't give up on the area yet

R: Noted.

C: Seems like the model results will be important to consider before much more discussion can be held. Maybe look at a 20%, 40% and 60% reduction scenario run through the model and see what hydrologic and economic impacts are predicted. On each of the model runs, run 3 ways of reducing the water use like done in the trial model runs – using a CREP program, cutting these percentages across the board (all water rights) and cutting these percentages from the top – junior water rights.

R: Staff will try these runs.

(NOTE: The above items were merely captured as comments/questions/discussion points. No final decisions or recommendations were made by the meeting participants regarding any of them.)
